DRE Titan XL
Large Animal Anesthesia Machine

Everything you need for large animal anesthesia
The DRE Titan XL is a complete large animal anesthesia support system. The system can be used for spontaneous breathing or the user may utilize the popular Dräger AVE ventilator which is an electronically controlled, time cycled, pneumatically-driven anesthesia ventilator capable of delivering from one-half (1/2) to 15 liters of tidal volume at 1 to 99 breaths per minute and I to E ratios from 1 to 2 to 1 to 4.5.

Features:
- For use with large animals
- 5-15 liters of tidal volume available
- 0-10 liters per minute O2 Flow meter
- Ventilator is time cycled and electronically controlled
- Frequency control variable from zero to ninety-nine breaths per minute in one BPM increments
- Touch control tidal volume adjustment
- Vapor exclusion system protects from both vaporizers delivering agent. One is in use, while the other shuts off.
- Top of machine acts as a storage shelf; particularly good for placing a monitor on

Includes:
- CO2 Absorbed
- Bellows
- Refurbished Drager Ventilation
- 2 Circuits
- Breathing Circuits

Optional Accessories:
- Foal Absorber
- Extended Inspiratory and Expiratory Ratios
- Large Animal Sized Endotracheal Tubes
- 15 Liter Bags
- 30 Liter Bags

SPECIFICATIONS

Electrical
110 V

Ventilator
On/Off Switch
