Safe and Effective Localized Warming and Cooling Therapy

The T/Pump system provides safe and effective localized warming and cooling therapy with precise temperature control. Simple and versatile, T/Pump is used for a number of applications to meet the needs of an ever-changing patient population.

Features:

» Conveniently operates with tap water without the need for sterile or distilled water.
» Three layer safety system helps ensure safe operation.
» T/Flash technology provides a slight temperature change, providing patients with an “always there” feeling that the product is working.
» Ergonomic design with comfortable handle to make transport easy.
» Audible and visible alarms alert caregivers to low water or internal issues.
» Large translucent reservoir has a large capacity and allows users to determine water levels at a glance.

The T/Pump Stand provides ease of transporting to patient rooms and offers storage for pads and accessories. An IV Pole Mount Plate is also available as a space-saving solution.

Multiple temperature settings and treatment cycles allow for therapy that is customized to patient needs. Large buttons and LED indicators make operation simple and intuitive.

Extra wide leakproof cap includes a tethered strap to prevent cap loss. Simply fill with tap water for warming or tap water and ice for cooling.
