

# Large Animal Anesthesia Impedance/PEEP Valve

An effective solution to low blood oxygen (hypoxemia) in horses under general anesthesia

## Features:

- ✓ Easy to Use
- ✓ Non-Disposable (Reusable)
- ✓ Durable with Only a Single Moving Internal Part
- ✓ Providing an Adjustable Airway Pressure (0- > 50 cm H<sub>2</sub>O) Using a Rotary Dial
- ✓ Precision in Determining Airway Pressure using a **Downstream Manometer**
- ✓ Fits all **Large Animal Anesthesia Machines**

## Facts:

- ✓ **Hypoxemia** (low blood oxygen) is an important complication in horses under general anesthesia.
- ✓ Hypoxemia can have a detrimental effect on the outcome in sick animals (colic horses).
- ✓ Lung (atelectasis) collapse is the primary cause of hypoxemia in anesthetized animals.
- ✓ Impedance/PEEP valves have been used in people and small animals to overcome lung collapse under general anesthesia for years!
- ✓ This is the first and only stand-alone impedance valve designed to be used for large animals.

## SPECIFICATIONS

**Weight:**  
3.6 lbs | 1.6 kg

**Length:**  
9" | 22.9 cm

**Width:**  
2.5" | 6.4 cm

**Height:**  
9.5" | 24.1 cm

**Material:**

PVC  
Steel  
Stainless Steel

#13545
