Every day, veterinary facilities rely on medical equipment from DRE to provide quality care to their patients. Your facility can save time and money by turning to DRE for all the new and refurbished equipment you need. DRE is:

A nationally-recognized leader in veterinary and research equipment. Since we began in 1984, our company has established itself as a knowledgeable equipment provider with extensive industry knowledge. You can trust us to know the market, and to guide you to the right products for your facility.

A single supplier for all of your medical equipment needs. Trust our friendly staff to provide affordable and innovative solutions for your facility. We offer one of the nation's widest selections of new and refurbished veterinary equipment and strive to be a complete equipment resource, providing each customer with a pleasant equipment procurement experience.

Vaporizer Cleaning and Calibration Maintenance Services
Our skilled biomedical staff offers superior pricing and a quick turnaround.

We also have a wide selection of new and professionally refurbished vaporizers from Penlon, Ohmeda, and Dräger.

Hippo Manager
Veterinary Practice Management Software
Affordable, easy-to-use practice software helps veterinarians manage their offices and patient records

- Medical histories and charting for appointments, reminders, billing, user tasks and more.
- Appointment scheduler gives you the ability to add resources, export data for reminder calls or postcards and much more.
- Integrated point of sale system includes transactions, inventory, gift cards, discounts, email receipts and more.
- Unlimited document storage, add files, images and results to patient files for easier access and to free up space in the office.
- No support fees and a US based help desk help with any troubleshooting or training issues. Video training is also available 24/7!
- Learn more about Hippo Manager at dreveterinary.com!

DRE Premier XP
Compact anesthesia system offers true mobility throughout your facility
- 0.1 – 4 lpm oxygen flowmeter with rotary float and large, easy to read scale.
- 1,500 mL CO₂ absorber designed for easy and fast replenishing of soda lime.
- New momentary closed feature incorporated into the pop-off valve.
- Recessed flush valve (prevents accidental activation).
- Quick-connect fresh gas outlet for easy and secure switching between breathing circuits.
- Includes five-year manufacturer’s warranty.

DRE University Pro
Sophisticated anesthesia workstation adapts to the needs of your facility
- 0.1 to 4 lpm oxygen flowmeter, coaxial or conventional.
- CO₂ absorber, dual vaporizer manifold with interlocking capability, recessed flush valve, rotary float, and dual canister for longer cases.
- Convenient instrument and upper monitor shelves, drawer assembly and e-tank holder included.
- Quick-connect fresh gas outlet for easy and secure switching between breathing circuits.
- Optional N₂O, medical air flow meters, N₂O tank holder, bain circuit adaptor, ventilator bracket with shelf and mounted IV pole.

DRE Transport 5000 Plus
A portable unit, designed for space saving and small facilities
- Compact for mobility with integrated safety functions.
- O₂, flush valve, vaporizer and O₂ hose. Optional bain circuit adaptor available.

Small Animal Anesthesia Accessories
- Slide Top Induction Chambers
- Close Top Induction Chamber
- Rodent Noise Cone/Face Masks
- Rodent Circuits

Anesthesia Options
- Bain Circuit Adaptor (non-rebreathing)
- E-tank Holder (single and dual)
- Scavenger Interface (active and passive)
- Circuit Alarm
- Top-Shelf Attachment

DRE Compact Mini
Small, easy-to-operate unit with an optional carrying case.
- O₂ flow meter, new or refurbished vaporizer and O₂ hose.
- Available with rodent nose cone and rodent circuit, or t-piece adaptor with shut off valve for one or two patients.

DRE Compact 150
Includes O₂ flow meter, O₂ flush valve, new or refurbished vaporizer and O₂ hose.
- Available with rodent nose comb and a rolling stand.
- Customizable with multiple flowmeters for anesthetizing multiple animals.

www.dreveterinary.com • 1-800-980-1282
DRE Titan XL
Large animal anesthesia system for equine, bovine and a variety of zoological animals
Frequency control variable from 0 to 99 breaths per minute in one BPM increments.
5 - 15 liters of tidal volume available.
Ventilator is time cycled, electronically controlled and pneumatically-powered.
Inspiratory flow controlled through operator adjustable regulator.
Touch-control tidal volume adjustment.
Vapor exclusion system protects from both vaporizers delivering agent. One is in use, while the other shuts off.
Optional scavenger interface, Foal absorber, Extended inspiratory and expiratory ratios.
Large animal sized endotracheal tubes available.

Three-year warranty!

DRE Integra SL
Compact system for operating rooms where space is at a premium
Electronic flow display and conventional flowmeter options are available.
Six ventilation modes.
New top shelf with secure GCX mounting system for patient monitors.
 Territory-specific electrical outlet options.
Selectatec compatible back bar (one or two stations).
Illuminated workspace with large capacity drawer units.
GCX compatible aluminium uprights for additional accessory mounting. Integrated CO2 absorber and bellows unit with ventilator interface.
MRI-Compatible version available.
Web ID 12412

GE Datex Ohmeda Aestiva 5
Superior ventilation: 7900 SmartVent™.
Volume Mode, Pressure Control Mode, Pressure Support (PSvPro), Synchronized Intermittent Mandatory Ventilation (SIMV), electronic PEEP.
Optimized system for low and minimal flow anesthesia, reducing agent consumption to save on anesthetic agent costs.
Web ID 11645

Dräger Narkomened GS
Durable anesthesia workstation that is intuitive and easy to use
Built-in monitor displays volume, pressure and O2 data.
Includes AV2+ ventilator, which is pressure-limited, time-cycled and volume preset.
Also includes a fresh gas system, cylinder yokes, back-up battery and O2 flush.
Web ID 11650

Nuvo Lite Mark 5
Oxygen Concentrator
Efficient and easy to use
Liter Flow: 0.125 to 5 LPM
Oxygen Concentration: 90% (+6.5% / -3%) at 5 LPM
Oxygen Pressure: 7 PSI
Standard DISS fitting.
Onboard oxygen purity alarm.
Built on the reliable Nuvo Platform.
Lockable flow control valve.
Web ID 12779

Operating within your budget!
DRE Stainless Steel Gurney with Anesthesia Machine

**Combination of stainless steel gurney with optional DRE Premier XP Anesthesia machine**

- 16-gauge NSF stainless steel.
- Two 5” locking casters.
- Available in custom sizes with single or dual e-tank holders.

**DRE Premier XP:**
- 0.1 to 4 oxygen flowmeter with rotary float.
- 1500 ml CO₂ absorber designed for easy and fast replenishing of soda lime.

Web ID 10105

---

**DRE Puma**

**Accurate, electronically controlled anesthesia ventilator**

- Customizable alarm parameters for upper and lower airway pressure limits.
- Clear, wide angle LCD display panel.

Web ID 12555

---

**Hallowell Ventilators**

**Available models:**
- Hallowell EMC 2000 and 2002 with and without Adjustable I:E Ratio
- Pressure limited: Increases patient safety by limiting the maximum working pressure that can be adjusted to a pressure range of 10 to 60 cmH₂O.

Web ID 589

---

**Penlon Nuffield 200**

**MRI-compatible anesthesia ventilator**

- Simple controls: A wide range of settings enable a constant flow during the inspiratory phase and infinite variability of I:E settings.
- Available with a circle system and/or Newton Valve for the ventilation of small patients.

Web ID 48

---

**DRE SureVac 22L**

**Dependable sterilization**

Easy-to-use, 22-liter vacuum autoclave.

- Microprocessor controlled unit features an intuitive user interface for safe and efficient operation.
- Digital display indicates parameters and conditions.
- Automatic self-checking mechanism diagnoses and protects against overheating or over-pressurization.

Web ID 12715

---

**Tuttnauer 3870EA**

**Large Capacity Automatic Autoclave**

Closed-door active drying system to maintain sterility and efficiency.

- Program parameters can be changed and stored.

Web ID 114

---

**Tuttnauer EZ9**

**Automatic Autoclave**

Closed door active drying system to maintain sterility and ensure efficient drying of packs and pouches.

- High efficiency air pump
- Customizable, storable program parameters.

Web ID 420

---

**Centrifuges**

**DRE Universal Centrifuge**

- 0 – 13,000 rpm and eight interchangeable rotors available.
- LED or mechanical timer.
- Capacity: 24 capillary.

Web ID 120

---

**DRE Microhematocrit Centrifuge**

- 0 – 13,000 rpm, safety latch and an inner switch shut-off.
- Safety power shutout lid.
- Capacity: 24 slides.

Web ID 118

---

**DRE Standard Centrifuge**

- Mechanical 60 minute timer.
- Capacity is for eight 15 mL tube rotor placement operating at 0 – 45,000 rpm.

Web ID 119

Operating within your budget!
Physio-Control Lifepak 20
Defibrillator/Monitor
CprMAX™ technology.
Easily converts to manual mode.
Paddle choices: Standard, pediatric, and/or sterilizable; internal and external.
Optional Pacing, AED, and SpO2 capabilities.
Web ID 11385

Philips Heartstart XL
Biphasic Defibrillator with ECG Monitoring
Combination manual device with automated external defibrillator capabilities.
ECG monitoring with pads or electrodes.
SMART Biphasic Technology.
Charges to highest energy level, 200 Joules, in less than 3 seconds.
Web ID 12103

Physio-Control Lifepak 9
Defibrillator/Monitor
Microprocessor-based unit with optional pacing.
Operates on either AC Power or Internal Battery power.
Allows for 17 energy selections, HR alarms, 5-lead monitoring, recorder and CODE Summary critical event record.
Optional small animal paddles available.
Web ID 87

HP Codemaster XL+
Defibrillator/Monitor
High-performance, lightweight defibrillator.
Cardioscope, noninvasive pacemaker and recorder.
Comes with ECG cables, leads, pads and battery.
True easy 1-2-3 operation.
Standard with built-in small animal paddles.
Web ID 90

DRE Teres V-400
High speed veterinary dental unit
All-in-one unit lets you easily switch from polishing to scaling to cutting.
Surgical stainless steel, heat-treated tips glide smoothly across tooth surfaces.
Optional fiber optics system with high-speed handpiece.
Tips gently cool and lubricate teeth, and wash away dislodged debris.
Built-in 25K ultrasonic scaler maintains optimum frequency.
Web ID 1512

Scale-Aire Mini
A powerful and potent tool against periodontal disease
Connects to an nitrogen tank easily with NO costly compressor required.
Surgical stainless steel, heat-treated tips glide smoothly across the tooth surface.
Water flows internally through the tip directly to the operative site, gently cooling and lubricating the tooth, washing away the dislodged debris.
Web ID 9857

Son-Mate II
Combination scaler/polisher
Water line with quick disconnect attached.
From 200 RPM high torque micro-motor with forward/reverse switch.
One foot control for both scaling/polishing modes.
Includes a scaler handpiece with an inserted stack (transducer), assorted tips and a tip wrench.
Web ID 9674

Ultrasonic Dental Scaler
Alternate from scaling to polishing at the touch of a switch.
Water line with filter and quick disconnect.
Perform curettage, deep scaling of heavy calculus and stain removal.
Transducer (stack) inserted in the handpiece.
Web ID 12578

Handpiece is air and water-driven, and can be used for cutting and extracting teeth
DRE Citadel 180
Easily-programmable electrosurgical unit
180-watt power supply with innovative tissue feedback technology.
Patient return electrode monitoring and various cut and coagulation settings.
Web ID 12597

DRE Citadel 300
Easily adapts to a variety of settings
Stable, 300-watt power supply over a wide range of tissue with innovative tissue feedback technology.
Patient return electrode monitoring for increased safety during every procedure.
Navigate 30 cut and coag settings with the easily-programmable interface for quick and simple setup.
Safety-diagnostic protocols help to ensure all parts and accessories are functioning properly.
Spray coagulation function provides homogenous, efficient coagulation over a large area.
Web ID 12598

DRE Citadel X3
A versatile, highly-adjustable electrosurgical unit
Easily keep pace with any dynamic operating room environment.
Internet connectivity and data logging capabilities.
Web ID 12646

DRE Citadel EVS
Provides vessel sealing and bipolar electrosurgery capabilities
Easily keep pace with any dynamic operating room environment.
Internet connectivity and data logging capabilities.
Web ID 12701

DRE ASG-300
Specifications (in watts)
Cut I/II: 300 W
Blend: 200 W
Pinpoint: 120 W
Spray: 80 W
Bipolar: 80 W
Also includes laparoscopy mode
Web ID 244

Electrosurgical Accessories
- Foot Switch
- ESU Pens
- Bipolar Forceps
- Grounding Plates and Cords
- Electrodes

Valleylab Force FX
For bipolar and monopolar procedures
Power for cutting, desiccating, and fulgurating tissue.
Improved safety/dependability.
Web ID 790

Valleylab Ligasure
Vessel sealing system provides permanent vessel occlusion
Revolutionary technology replaces almost all other hemostatic tools — fuses vessel walls to create a permanent seal.
Isolated output configuration.
Web ID 9808

ValleyLab Force Triad
First-of-its kind integrated solution for open and laparoscopic electrosurgical procedures
All-in-one unit is compatible with conventional electrosurgical instruments and all current and new LigaSure instruments.
Combines three different tissue effects: monopolar, bipolar and vessel sealing.
Web ID 12559

Optional carts available

DRE Animal Health Division has the information, knowledge, and products to create, design or consult on Medical Gas layout in new clinics or existing facilities. Our Animal Health Division can help ensure that your clinic’s design allows for an economical gas system.

Visit www.dreveterinary.com to receive more information or schedule a medical gas consult today!

**Easy to use and service, saving valuable time and money for your veterinary facility**

**Professional-grade systems are ready for installation**

- Conforms to NFPA 99 and CGA standards
- Easy maintenance without removing faceplate
- Compensates for variation in wall thicknesses up to 7/8”
- Gas-specific outlet body with a modular design
- All outlets are 100% tested for flow and leaks

**Superior outlets**

- Double O-ring seal that doesn’t deform and leak when weight is added to the outlet front
- Outlet is capable of supporting 10 lbs. at 2” without leaking
- Outlets incorporate protective vinyl labels that are durable and scratch resistant

**Suction and Waste Gas Management**

- AED gas evacuation system
- Anesthesia detection bridge
- Vacuum pumps and scavenging system

**Gas delivery management**

- Headwalls, consoles and rail systems
- Gas outlets, manifolds and air compressors, alarm systems and pressure switches
- Fittings and hose assemblies
- Emergency oxygen inlet box
- Nitrogen control panel and conversion kits
- Check, relief and ball valves, and zone valve boxes

**Operating within your budget!**
DRE Compass LED

**Combination of classic aesthetics and modern technology**

- 6-step magnification system
- LED lightsource Lux, life, Kelvin
- 20W LED coaxial illuminator
- 10x Wide Field Eyepiece (12.5x available)
- 250mm Objective Lens (200-400mm also available)
- Counter-balanced pantographic arms design and tension control adjustable
- Integrated Video Camera

Zeiss Opmi 6S-CFC

Zeiss optics: Sharp optical view; terrific depth of focus; inclined binocular with eyepieces; high resolution, internal motorized focus and zoom; bright red reflex.

Web ID 646

---

DRE Waveline Touch

**Bright, easy to use, color touchscreen display with up to 8 adjustable waveforms.**

Integrates with DRE Vetrec Telemetry Systems.

**Built-in battery and printer optional.**

**Multi-lead ECG monitoring with optional EtCO₂**

*Web ID 9460*

- **Parameters:** 3 or 5 lead ECG, Nellcor or Masimo SpO₂, Suntech NIBP, respiration, dual temperature and heart rate.
- **Optional:** EtCO₂ (Sidestream or Mainstream), and Dual Invasive Blood Pressures.

---

DRE Waveline VS

**10.1” Color TFT LCD Screen.**

Suitable for feline, canine, and other animals.

**Portable multi-parameter monitor**

*Web ID 12394*

- **Parameters:** 3 or 5 lead ECG, SPO₂, Suntech Noninvasive Blood Pressure, Dual Temperature, and Respiration.
- **Optional:** 2-IBP, Philips Respironics CO₂ (Mainstream and Sidestream), and Thermal Recorder.

---

DRE Waveline EZ

**Graphical and tabular trending.**

Advanced ST and arrhythmia detection.

Integrates with DRE Vetrec Telemetry Systems.

**Portable touchscreen monitor**

*Web ID 9765*

- **Parameters:** 3 or 5 lead ECG, Suntech NIBP, respiration, Nellcor or Masimo SpO₂, dual temperature and battery backup.
- **Optional:** EtCO₂ and Dual Invasive Blood Pressures.

---

**Microscopes**

**Laboratory Microscopes**

- **Accu-Scope Compound 3002**
  
  Equipped with sharp, high contrast objectives on a rugged, die-cast aluminum frame. Features ergonomic focusing controls, all brass gears and the widest field of view eyepieces in its class.

  *Web ID 1031*

- **Accu-Scope Compound 3000 LED**
  
  Features infinity plan optical system, a 20mm field of view and a super-bright 3 watt LED illuminator to provide high contrast images with outstanding resolution.

  *Web ID 329*

- **Accu-scope Excelis HD Color Microscopy Camera**
  
  Full-featured HD camera that offers 60 fps video preview and simultaneous live image output to an HD monitor and to a computer via USB 2.0.

“The DRE Vetrec VST makes cardiac monitoring easy and cost efficient by monitoring multiple patients at once without using multiple cage side units. The portable transmitters allow patients to move about freely.”

Leslie Wereczczak, LVMT, VTS
Small Animal ICU Supervisor, University of Tennessee College of Veterinary Medicine

Monitor multiple patients from a single location with the

**DRE Vetrec VST**

Fully-configured telemetry system designed for emergency and critical care/ICU settings.

Seamless integration with wireless ECG transmitters and DRE Waveline multi-parameter monitors.

Provides auto charting; full disclosure (96 hours); auto-generation of alarm events; manual recording (ECG analysis); trends, charts and strips for arrhythmia; ECG data detection; and color waveforms.

Automatically compiles and archives user-selectable discharge reports.

With a networked system, you can e-mail discharge reports in PDF format.

Keep watch of up to 16 patients at once using waterproof ECG transmitters and DRE multi-parameter monitors!

Connect VST transmitters directly to patients for ECG monitoring, or utilize DRE-brand patient monitors to view multiple parameters from the central station. See pages 17-18 for more monitor options!

**Web ID 421**

**Features flexible software that can be customized to the specific needs of your facility.**

**ECG Transmitters**

- Small, portable and lightweight
  - Single, multi-lead
  - Independent lead wires
  - Operates on two AAA batteries
  - Frequency: Medical 608 MHZ
  - Waterproof
  - Flexible and durable

**Easy-to-use graphical interface**

The Vetrec VST features split screen technology that allows you to review, edit and enter patient information while observing all patients in the system.
DRE Maxx Luxx LED 160
Exceptional 160,000 lux and a rich, adjustable color temperature
Built to last at a rated 50,000 hours. 160,000 lux output (14,800 foot candles).
German engineered arm system for superior positioning.
Adjustable focusing and CRI.
Adjustable color temperature for optimizing tissue colors.
Web ID 12563
Available in dual ceiling, single, and wall configurations

DRE SLS 9000 Plus
Bright, consistent illumination
Maximum output rated at 140,000 Lux.
Rated for 50,000 hours of LED life.
Expertly engineered design makes it easy to position and adjust light heads for any surgical procedure.
LCD touch screen operation measures illumination intensity, color temperature and Chromogenic index.
Web ID 12721
Available in single and dual wall or ceiling mount and a portable floor model

DRE Maxx Luxx LED
Maximum brightness with extremely cool output for 50,000 hours
Superb color temperature of 4,300° Kelvin.
Wide range mechanical 5-stage dimming.
130,000 lux output at 1 meter.
6.5” – 9” adjustable pattern.
Web ID 12160
Available in multiple mounting configurations with light heads, camera, and monitor combinations

DRE Vision EX5
75,000 lux output perfect for small procedures
Extremely long life at a rated 50,000 hours.
4,300° Kelvin color temperature.
Extremely cool output — lowest possible heat.
3-stage dimming.
Web ID 12524
Available in multiple mounting configurations including single and dual wall or ceiling mount and a portable floor model

DRE Vision LED
Provides unsurpassed longevity and flexibility
50,000-hour rated LED life.
100,000 lux output at 1 meter.
4,300° Kelvin color temperature.
5-stage dimming and on/off switch on the patented sterilizable handle.
Web ID 9830
Available in multiple mounting configurations including single and dual wall or ceiling mount and a portable floor model

DRE Vista LED
Low energy, low heat, high efficiency
50,000 lux of homogenous light output at 1 meter.
4,300° Kelvin color temperature at 24”(61 cm) distance.
Life rating of 50,000 hours.
2-stage dimming.
Web ID 11087
Available in dual ceiling, single, wall and mobile floor model configurations

Operating within your budget!
DRE SLS 2500 LED
Dimming knob located on the side of the light head for quick and easy adjustments.
Color temperature close to natural sunlight with 3,500 K ~ 5,000 K.
Light and strong nova alloy arm allows easy and convenient positioning.
60,000 lux output at 1 meter.
Web ID 12379

DRE Vista Flex LED
Cost-saving, energy-efficient LED bulb produces up to 50,000 hours of illumination.
Provides a color temperature of 5,300 K.
Light produces 70,000 Lux at an eight inch working distance.
Control panel features intuitive controls and two handles for easy maneuverability.
Web ID 12755

DRE SLS 9000 LED
Shadowless light with 90,000 lux output
50,000-hour rated LED life.
Color temperature of 3,500° - 5,000° Kelvin.
LCD touch screen operation measures illumination intensity, color temperature and Chromogenic index.
Web ID 12349

DRE Avanti NXT
Complete, efficient infusion for your facility
Incorporated anti-bolus system reduces the occurrence of bolus after sudden occlusion release.
Middle detection and ultrasound detection technology help to ensure correct IV settings.
Basic speed mode ranges 1 - 600 ml/h.
High speed mode ranges 1 - 2000 ml/h.
Web ID 12714

Baxter Flo-Gard Series
Flow check occlusion alarm — an in-line resistance display of incremental back pressure.
Programmed delivery profile allows up to 10 steps, individualizing control of infusion ramping and tapering.

Baxter Flo-Gard 6301
Two channels
Web ID 570
Baxter Flo-Gard 6201
One channel
Web ID 571

DripAssist Gravity IV
Simplifies IV fluid administration
A monitor and alarm for gravity IV fluid applications.
Precision measurement and monitoring without the complexity of expensive infusion pumps.
Web ID 12445

Syringe Pumps
Baxter AS50
Flexible and configurable drug libraries.
Accurate infusion of intravenous solutions, drug solutions, whole blood, and packed blood cells.
Web ID 809

Medfusion 3500
Programmable does limits.
Rapid occlusion detection.
